

PROGRESS REPORT

FOR 4/16

Chi Chen

OUTLINE

- Mock the process of figuring out how to trigger the specific line
- Try to modify the chimpcheck with non-shutdown version

PROBLEMS I MEET

- The framework we use in jUnit can't stop in the end of the script
 - It is because we use the jUnit in our chimpcheck as framework, we submit the script and it will run the script for us. But if we use this framework, then we need to follow the rule of this framework.

DETAIL OF THE PROGRESS

- Details are in this link, I create a page for recording how I go through all of those.
