# PROGRESS REPORT

FOR 4/9

Chi Chen

OUTLINE

- Label the chimpcheck script for trigger the previous lines
- Try to coordinate chinpcheck with jupyter notebook

PROBLEMS I MEET

- Run scala script in jupyter notebook
  - It takes me some time to successfully add the scala kernel into jupyter notebook and can run with this.

- Can't import scala package in jupyter notebook
  - I stuck in using package in jupyter notebook, I'm not sure if it's possible. Because I saw some article said that jupyter didn't support importing scala package. But some articles said there are some way to try that.

DETAIL OF THE PROGRESS

- Details are in this link, I create a page for recording how I go through all of those.
