# PROGRESS REPORT
FOR 3/19

Chi Chen

OUTLINE

- Focus on NextCloud app and try to trigger random 8 line in different files in different folders.

- Successfully trigger 5 of them now.

- Still working on triggering the other 3 line.

PROBLEMS I MEET

- Connection problems in NextCloud
  - Just like last time I said, the connection of NextCloud isn't stable, I can't connect to server for one day long, but I don't know how to fix that. However after one day, it became normal again……

- Insufficient of knowledge for android code
  - This time, I need to deal with more different situation in this app, and I meet more problems to realize what this method was about. And I need to learn how to use this app in some situation as well.

HOW I TRIGGER THE SPECIFIC LINE

- Details are in this link, I create a page for recording how I go through all of those.

- I tried to list how I trigger that line with more detail this time, and I also append the link to the code.
